(Additional resources: <http://www.eia.doe.gov>)

^a Best estimate for U.S. petroleum consumption is the amount of petroleum products supplied to the U.S. in a given year. This is not the sum of crude oil production and net imports due to processing gain and stock changes.

^b Transportation petroleum use can be found on Table 2.5.

^c Data are not available.

^d Average annual percentage change is for years 1973–93 and 1985–93.
